PROREXIA

NPN  | 80081361
---|---
FORMAT | 60 capsules

INDICATIONS
- Erectile dysfunction.
- Increases desire, erectile power, and sexual performance.
- Increases sexual satisfaction.

POSOLOGY
- 2 capsules in the morning and 2 at night

WARNING
- Do not use if you have had a heart attack / myocardial infarction.
- Consult a health care practitioner before using this product if you are taking antidepressants, medications for cardiovascular disease, erectile dysfunction and/or anticoagulants, or if you have diabetes or kidney disease.
- Some people may experience insomnia, anxiety or headaches. In which case, discontinue use of the product. Other people may experience gastrointestinal discomfort (such as diarrhea).

COMPOSITION

Maritime Pine extract (Pinus pinaster, bark) ......................... 1 mg (20:1, QCE 20 mg)
L-Arginine (L-Arginine L-aspartate) ........................................ 700 mg
Panax ginseng (Root) ......................................................... 0.625 mg (20:1, QCE 12.5 mg)
Maca (Lepidium meyenii, Root) .............................................. 25 mg (30:1, QCE 750 mg)
Tribulus (Tribulus terrestris, whole plant) ............................... 25 mg (30:1, QCE 750 mg)

DOCUMENTATION

An increasing number of men over the age of 40 are suffering from erectile dysfunction. This sexual disorder can be caused by natural aging and decreased male hormone (testosterone). Other causes, such as cardiovascular disease, diabetes, being overweight and sedentary can also be related to erectile dysfunction. So, it is important to consult a health professional. The combination of maritime pine extract and L-Arginine L-aspartate, and other medicinal plants is a natural and scientifically validated way to prevent and correct the appearance of this sexual disorder.

MARITIME PINE EXTRACT

Maritime Pine extract, consisting mainly of catechin, epicatechin and procyanindin, has interesting and safe antioxidant and anti-inflammatory properties to improve, among others, reproductive and cardiovascular health. This natural product promotes erection by vasodilating the blood vessels (via activation of the endothelial enzyme, nitric oxide synthase e-NOS), whose effect is increased tenfold by the synergistic action of L-arginine L-aspartate.
L-ARGININE L-ASPARTATE

L-arginine, is a semi-essential amino acid precursor of nitric oxide (NO), responsible for improving blood flow to the penis. This mechanism positively influences male fertility through testosterone production, sperm production, increased erectile power, endurance and sexual performance\(^1,2,9-11\).

PANAX GINSENG

Recognized in traditional Chinese medicine, Panax Ginseng is used as a tonic that improves health and promotes longevity. By its tonic effect it would improve physical performance, including sexual performance. Clinical and scientific studies attribute the positive effect of Panax Ginseng on erectile dysfunction to the elevation of the endothelial enzyme nitric oxide synthase e-NOS, by a mechanism as yet unknown which would not exclude a hormonal effect\(^12\).

MACA

Maca is a root vegetable used by Andean populations to promote fertility and sexual excitement among others. Studies have shown promising results to improve libido and erectile function after Maca supplementation\(^13,14\).

TRIBULUS

Tribulus is a plant used in traditional Chinese and Indian medicine, whose beneficial effects for health would be numerous\(^15\). Taken orally, Tribulus indirectly increases the hormone DHEA (dehydroepiandrosterone) in the blood thanks to the presence of Protodioscin in the extract\(^16\). The decrease in DHEA hormone in men is correlated with aging and the onset of erectile dysfunction\(^17\). Tribulus consumption improves sexual function. Its effects on sexual performance and satisfaction are validated in a randomized controlled clinical study\(^18\).
